Country wise Emissions

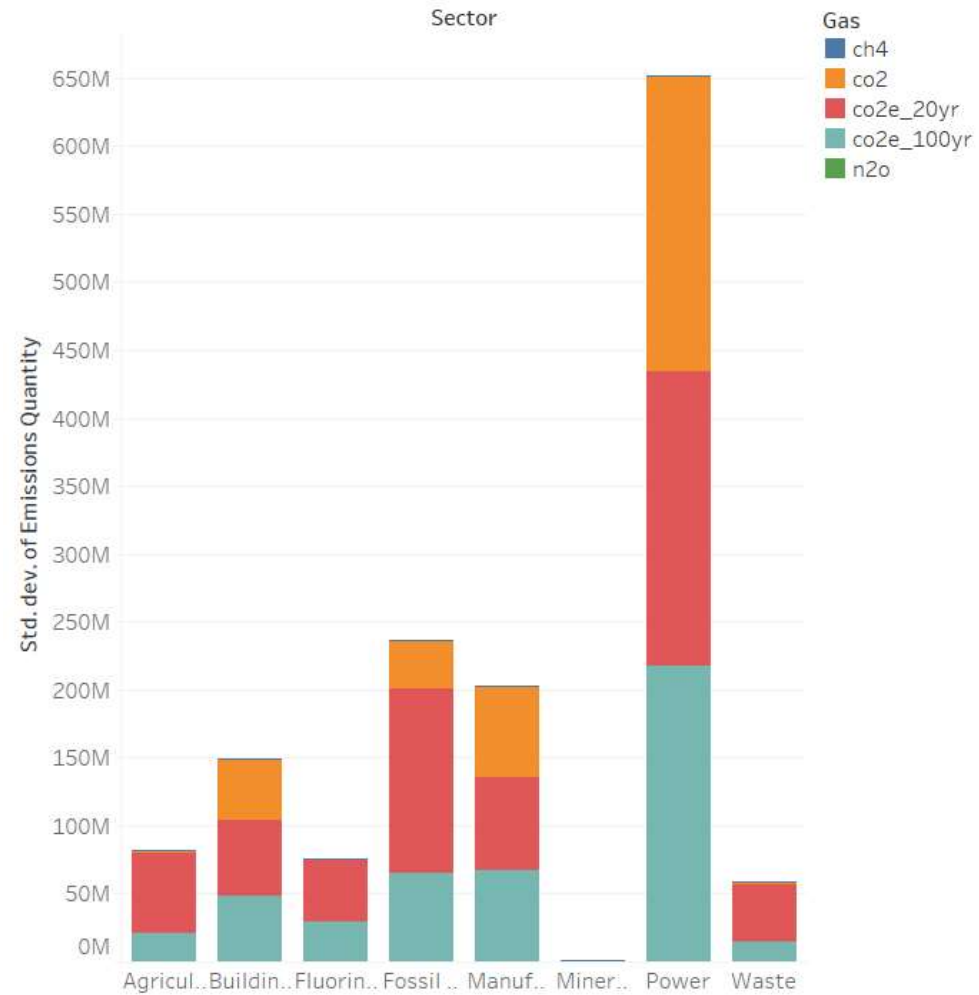

Map based on Longitude (generated) and Latitude (generated). Size shows average of Emissions Quantity. The marks are labeled by % of Total Emissions Quantity. Details are shown for Country. The data is filtered on Gas and Sector. The Gas filter keeps ch4, co2, co2e_100yr, co2e_20yr and n2o. The Sector filter keeps 8 of 8 members.

Top 10 Countries sector wise

Country Name. Color shows details about Country Name. Size shows average of Emissions Quantity. The marks are labeled by Country Name. The data is filtered on Gas and Sector. The Gas filter keeps ch4, co2, co2e_100yr, co2e_20yr and n2o. The Sector filter keeps 8 of 8 members. The view is filtered on Country Name, which keeps 10 of 254 members.

Sector wise gas emissions

Standard deviation of Emissions Quantity for each Sector. Color shows details about Gas. The view is filtered on Gas and Sector. The Gas filter keeps ch4, co2, co2e_100yr, co2e_20yr and n2o. The Sector filter keeps 8 of 8 members.

Sub sector Emissions

Sector	Original Inventory S..		Avg. Emissions Qu..
Agriculture	enteric-fermentation	1,180,507,306	4,157 34M
	rice-cultivation	971,979,136	
	manure-management	140,150,300	
	synthetic-fertilizer-..	125,296,717

	biological-treatmen..	11,350,642	

Maximum of Emissions Quantity broken down by Sector and Original Inventory Sector. Color shows average of Emissions Quantity. The marks are labeled by maximum of Emissions Quantity. The data is filtered on Gas, which keeps ch4, co2, co2e_100yr, co2e_20yr and n2o. The view is filtered on Sector, which keeps 8 of 8 members.
